Press Release - Multi-Function Office Machines Will Change the Face of Business

Lexmark and Voda Computer Systems Inc. have embarked on a joint marketing agreement that will enable small and mid-size business in the Thompson-Okanagan Region to benefit from the latest advances in the office equipment they rely on for day-to-day business: copiers, printers, and fax machines.

Rick Raynsford, Business Development Manager at Lexmark Western Canada says: *“The typical end-user is becoming more comfortable with ad hoc scanning, email attachment distribution, and faxing from desktop. Photocopiers are being used less and less. In a world where end-users decide what and when to print information out, MFP’s are a cost effective, alternative to the expensive dinosaurs of the copier world.”* He points out that Lexmark began as the print division of IBM, something the copier companies cannot claim or adapt easily to in this time of growing dependence on electronic records. Rick indicates that Lexmark provides top quality products in the new arena because printing and networking comprise the core business.

What does this mean for small and mid-sized business? It means that Thompson- Okanagan based companies can save money while increasing the speed and ease with which they do business. Rather than buying or leasing expensive production copiers that usually far-exceed the true business need, they can now work smarter by using 2 or 3 inexpensive printers that also act as fax machines and scanners. There is no risk to the customer. All they need is a desire to do business faster and smarter.

Voda Computer Systems Ltd. is pleased to be able to offer the Lexmark range of products to its customer base. Andrew Watson, Voda President says, *“We are thrilled to be one of the first local providers of innovative products and services that will help other local companies grow to the next level; be it regional or national. Voda understands the requirements of these companies, because we are local. Doing business with us yields low-risk and high reward because we too offer proven solutions and top quality services at a reasonable rate.”*
